Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 20 August 2003.

2a) This action is FINAL. 2b) This action is non-final.

Detailed Action***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. § 112:
 - I. Claims 1-26 are, drawn to **simultaneously processing multiple radio signals** and **simultaneously storing each radio signal in a buffer**, then outputting stored signals and portions; the override audio with telephone signal; the usage history traking classified in class 455, subclass 3.06, 412.1, 413. 405.
 - II. Claims 27-49, 51 are drawn to storing radio signal at the same time to converting previously stored digital radio data for outputting, associated with the **enhanced radio receiving system**, classified in class 455, subclass 186.1.
 - III. Claim 50 is, Drawn to vocal stripper, displaying received text lyrics, associated with the **sing along system**, classified in class 455, subclass 221.
 - IV. Claim 52 is, drawn to user initiated communication based on received radio information, associated with **radio reception and response system**, classified in class 455, subclass 69, 70. 24.
 - V. Claim 53 is, drawn to user created message having attribute indication of radio input, associated with **radio reception and message system**, classified in class 455, subclass 67.7.
 - VI. Claim 54 is, drawn to radio reception and communication device which allow user defined preference for first radio reception system used by the second radio reception system, associated with **radio preference sharing system**, classified in class 455, subclass 426.1, 448.
2. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2685

Inventions [I], [II], [III], [IV], [V], [VI] are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05 (C)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the above subcombination in groups [I], [II], [III], [IV], [V], [VI] are each distinctly structured from the others and having different features for the claimed subject matter for each group as shown above.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48 (b) and by the fee required under 37 C.F.R. § 1.17 (h).
